This highly skilled position requires excellent visual acuity, high attention to detail, organizational skills, a patient and success-oriented demeanor, and pride of workmanship.

Job Duties

- Receive, clean, and prepare parts for coating processes.
- Inspect part for defects and workmanship quality, both before and after coating.
- Read and interpret drawings and work instructions to understand quality requirements, cleaning methods, and appropriate tooling.
- Clean parts using established processes both by hand and using ultrasonic cleaning lines.
- Utilize calibrated inspection equipment to validate specification compliance.
- Complete inspection reports and logs, clearly and accurately.
- Support the setup of precision test stations and equipment.
- Maintain an inventory of chemicals and cleaning supplies.
- Work within an ISO9001 based Quality Management System.
- Work effectively without direct supervision.
- Perform other duties as assigned by supervisor.

Working Conditions and Physical Demands

- Exposure to chemicals, solvents, and coating materials.
- Clean room environment wearing protective gowning.
- Sitting while working under the fan noise of a laminar flow bench
- Use of safety glasses and latex gloves required.
- Ability to work under timelines and pressure.

Education, Credentials, and Qualifications

- US Person as defined by 22 CFR 120.15 (Citizen, Permanent Resident).
- High school diploma or equivalent.
- Excellent communication skills with fluency in compositional and conversational English.
- Highly organized and able to multitask with excellent attention to detail.
- Great eyesight (visual acuity) at close range for inspection
- Eager to learn new skills.
- Follow and execute detailed written procedures.

Special Requirements

- Willing to work weekends, as necessary and extended hours occasionally.

Pay: \$22.00 - \$30.00 per hour
